

## How to update Inverto Airscreen (IDL 400S)?

In order to proceed with the update you need:

1. PC with access to Inverto Airscreen web interface
2. Software Update file (idl4k.bin)
  - Can be downloaded at [www.inverto.tv/support](http://www.inverto.tv/support).

Update process:

- As the first step copy the update file to your PC, from which you access the web interface
- Open the web interface and select “System”
- Choose “Local firmware update” and click “Browse”, now choose the software update file (idl4k.bin) on your local hard drive.
- Select “Update” to start the update.
- The Inverto Airscreen will do all the next steps automatically.
- Wait until the Inverto Airscreen reboots

**Note:** Do not switch off your Inverto Airscreen while it is downloading and installing the software.

**Note:** In general we always recommend performing a factory default reset on the receiver, due to the new functionality it may add.
